CITY RESPONDS TO LAKE FLOODING

Updated flood information can be found on all the City's social media channels: City of Grapevine Facebook, Twitter (@GrapevineTXCity), City of Grapevine's YouTube channel as well as our website GrapevineTexas.gov. Multiple videos of the Grapevine Lake flood may be viewed on our YouTube channel and updated images continue to be posted on our City Facebook page. The City of Grapevine will open all areas currently flooded once water recedes, roadways are repaired and passage is safe.

May, 2015 has been recorded as the wettest single month on record for the State of Texas. Only six weeks prior, Grapevine Lake and all of Texas were dealing with a lengthy, severe drought. Due to extreme rain, our lake is currently 25' over normal pool level (535.0). Grapevine Lake is a man-made lake with a primary purpose of flood control. The project authorized by the Rivers and Harbors Act, passed by Congress on March 2, 1945, was the Trinity River Flood Control Project funded in part by the federal government. The cities of Dallas, University Park, Highland Park, and Grapevine contributed to the cost of building Grapevine Dam in return for future water rights. The Trinity River Project was designed to provide flood control of the river where it traversed through what is now known today as the DFW Metroplex. Initially, four dams were constructed as part of the project: Grapevine, Benbrook, Garza-Little Elm (Lewisville), and Lavon. Grapevine's function was to impound the waters of Denton Creek to assist in the flood control of the Elm Fork of the Trinity River. The Grapevine Lake reservoir covers an area of 7,380 acres and has a shoreline of 60 miles. The lake was to provide 238,250 acre-feet of storage capacity for flood control purposes and protection of the rich agricultural areas below the dam.

Our lake water flows from Denton Creek into Grapevine Lake which then flows into the Elm Fork of the Trinity River system. The U.S.

Army Corps of Engineers regulates the water release for our lake and the Corps conducts controlled releases from the dam when the Trinity River system is able to handle additional water. We anticipate high lake levels throughout the summer. Grapevine Lake has not flooded since 2007. At that time, the lake was at a lower pool level than our current flood stage and the Corps held water in Grapevine Lake for months during that summer. Many factors are considered when the Corps holds water at a specific pool level. Once we have a confirmed 'projected' date from the Corps as to when water will be released and/or when lake levels will significantly recede we anticipate substantial clean up will be necessary.

Volunteers will be mobilized to assist in collecting large amounts of debris and trash around the lake. Please email Mendie at mschmidt@grapevinetexas.gov to register as a volunteer for this effort.

Construction Soon to Begin on New Public Safety Building

Grapevine citizens voted in favor of a new Public Safety Building in 2012 as a part of the \$68 million bond proposal package which also included the funding of The REC. Construction is scheduled to begin this summer. This new facility will be located on Dallas Road, east of Target and will be home to our Police Department, Municipal Court, Fire Department Administration, Information

Technology Department and Logistics. This multi-level facility will boast three different buildings on one campus totaling approximately 104,000 square feet. Our first responders will also benefit from enhanced technology allowing them to better assist Grapevine citizens. The new Public Safety Building is scheduled to open in the Spring of 2017.

Bulk Recycling and E-Waste Recycling Available 24/7

The City of Grapevine has drop-off bulk, single stream recycling and e-waste recycling available to its residents every day.

Any questions regarding drop-off recycling should be directed to the City's Environmental Services division at 817.410.3330.

A green, 30-yard enclosed container is available for single stream recycling items that residents may have forgotten to put out for collection, exceed the amount that would fit in their recycling toter, or may be too large for curbside collection. This container accepts the same type of recycling that is acceptable for curbside pick-up.

A blue container is available for electronic waste recycling (this container accepts any item that has a power cord). We have a new drop off and are now accepting large kitchen appliances. There is a list inside the container of items that can and cannot be accepted. The containers are located in the animal shelter parking lot, 500 Shady Brook Drive.

Now accepting large kitchen appliances.

Watch Your Car Month

July is recognized as "Watch Your Car Month" by the Auto Burglary and Theft Prevention Authority (ABTPA) because of the number of vehicle burglaries and thefts. ABTPA was created by the Texas Legislature in 1991 to fund programs such as "Protect It. It's Yours" to empower Texans to take the necessary steps to reduce their risk of becoming a victim of an auto crime.

Approximately every eight minutes, a vehicle is stolen in Texas, and every two minutes, a vehicle is burglarized for its contents and/or parts. According to the National Insurance Crime Bureau (NICB), most vehicle burglaries and thefts occur during

July and August in the warm weather that blankets the United States.

Texas drivers must be vigilant in regards to vehicle crime prevention and reducing opportunity by implementing these daily practices:

- Lock your vehicle because 50% of all vehicle thefts and/or burglaries were due to the vehicle being left unlocked;
- Take your keys because 20% of all vehicle thefts the keys were left inside;
- Hide your valuables;
- Park near good lighting or congested parking areas because thieves do not like eye-witnesses; and

- Never leave your car running and unattended as it provides thieves an easy getaway.

Stroke and Heart Attack—Call 911

Stroke is the leading cause of serious, long-term adult disability. Most strokes occur at home and only half the patients call 911. Most fail to recognize the signs and symptoms and assume they will go away. Education is crucial. The treatment window is 3 – 4.5 hours from onset.

Signs & Symptoms

Sudden numbness or weakness

Difficulty Speaking

Blurred Vision / Dizziness

Severe Headaches

Call 911

Grapevine Fire Department (GFD) arrives fast and starts advanced medical care.

The ambulance staff is able to transmit your information to the hospital emergency department (ED) prior to arrival and provides advanced notification to the stroke team.

Time saves brain cells, treat quickly!

Heart Attack occurs about every 20 seconds. A death occurs about every minute. About 50% of deaths occur within one hour of the heart attack –outside a hospital. Sudden death is more common among women with heart attack. Women have a worse outcome than men after having a heart attack.

GFD and Baylor Regional Medical Center at Grapevine have set a goal from the time they have contact with the patient to a heart catheterization if needed in less than 60 minutes.

Benefits of calling 911

GFD arrives fast and begins advanced medical care.

GFD transmits an EKG from the scene to the emergency department.

GFD calls in your patient report giving advance notification to physicians.

GFD can activate a STEMI team so the team is ready and waiting on patient arrival. STEMI stands for ST Elevation Myocardial Infarction.

A Message from Grapevine's Public Health Official - Dr. Andrew Kilgus

Protect Yourself and Your Pets -

When it becomes personal, the problem is much more compelling. I have lived and practiced in Grapevine for over 30 years and have always had dogs. Ticks and fleas have not usually been a problem, but mosquitoes – yes! About two months ago I found an engorged tick on my Border Collie, Hank. I removed it and didn't think much more about it. A week ago Hank began to act listless, drinking a lot of water, and no appetite. A diabetes check was negative. Lab tests at the Vet's office diagnosed Addison's Disease. Germs from the tick had destroyed his adrenal glands.

(For my medical friends, potassium was over 10 and cortisol was 0.2). I'm happy to report Hank is recovering, but will be on medication for the rest of his life.

After all our rain, I'm sure mosquitoes and bugs of all kinds will be worse this summer. Protect yourself, your family and your pets with the appropriate spray or veterinary treatment. For the yard people like myself, wear long sleeve shirts too. We probably all have a few 20 year old ones in the closet.
